PACK YOUR BAGS TO TAKE A  
EXPEDITION ON MARS

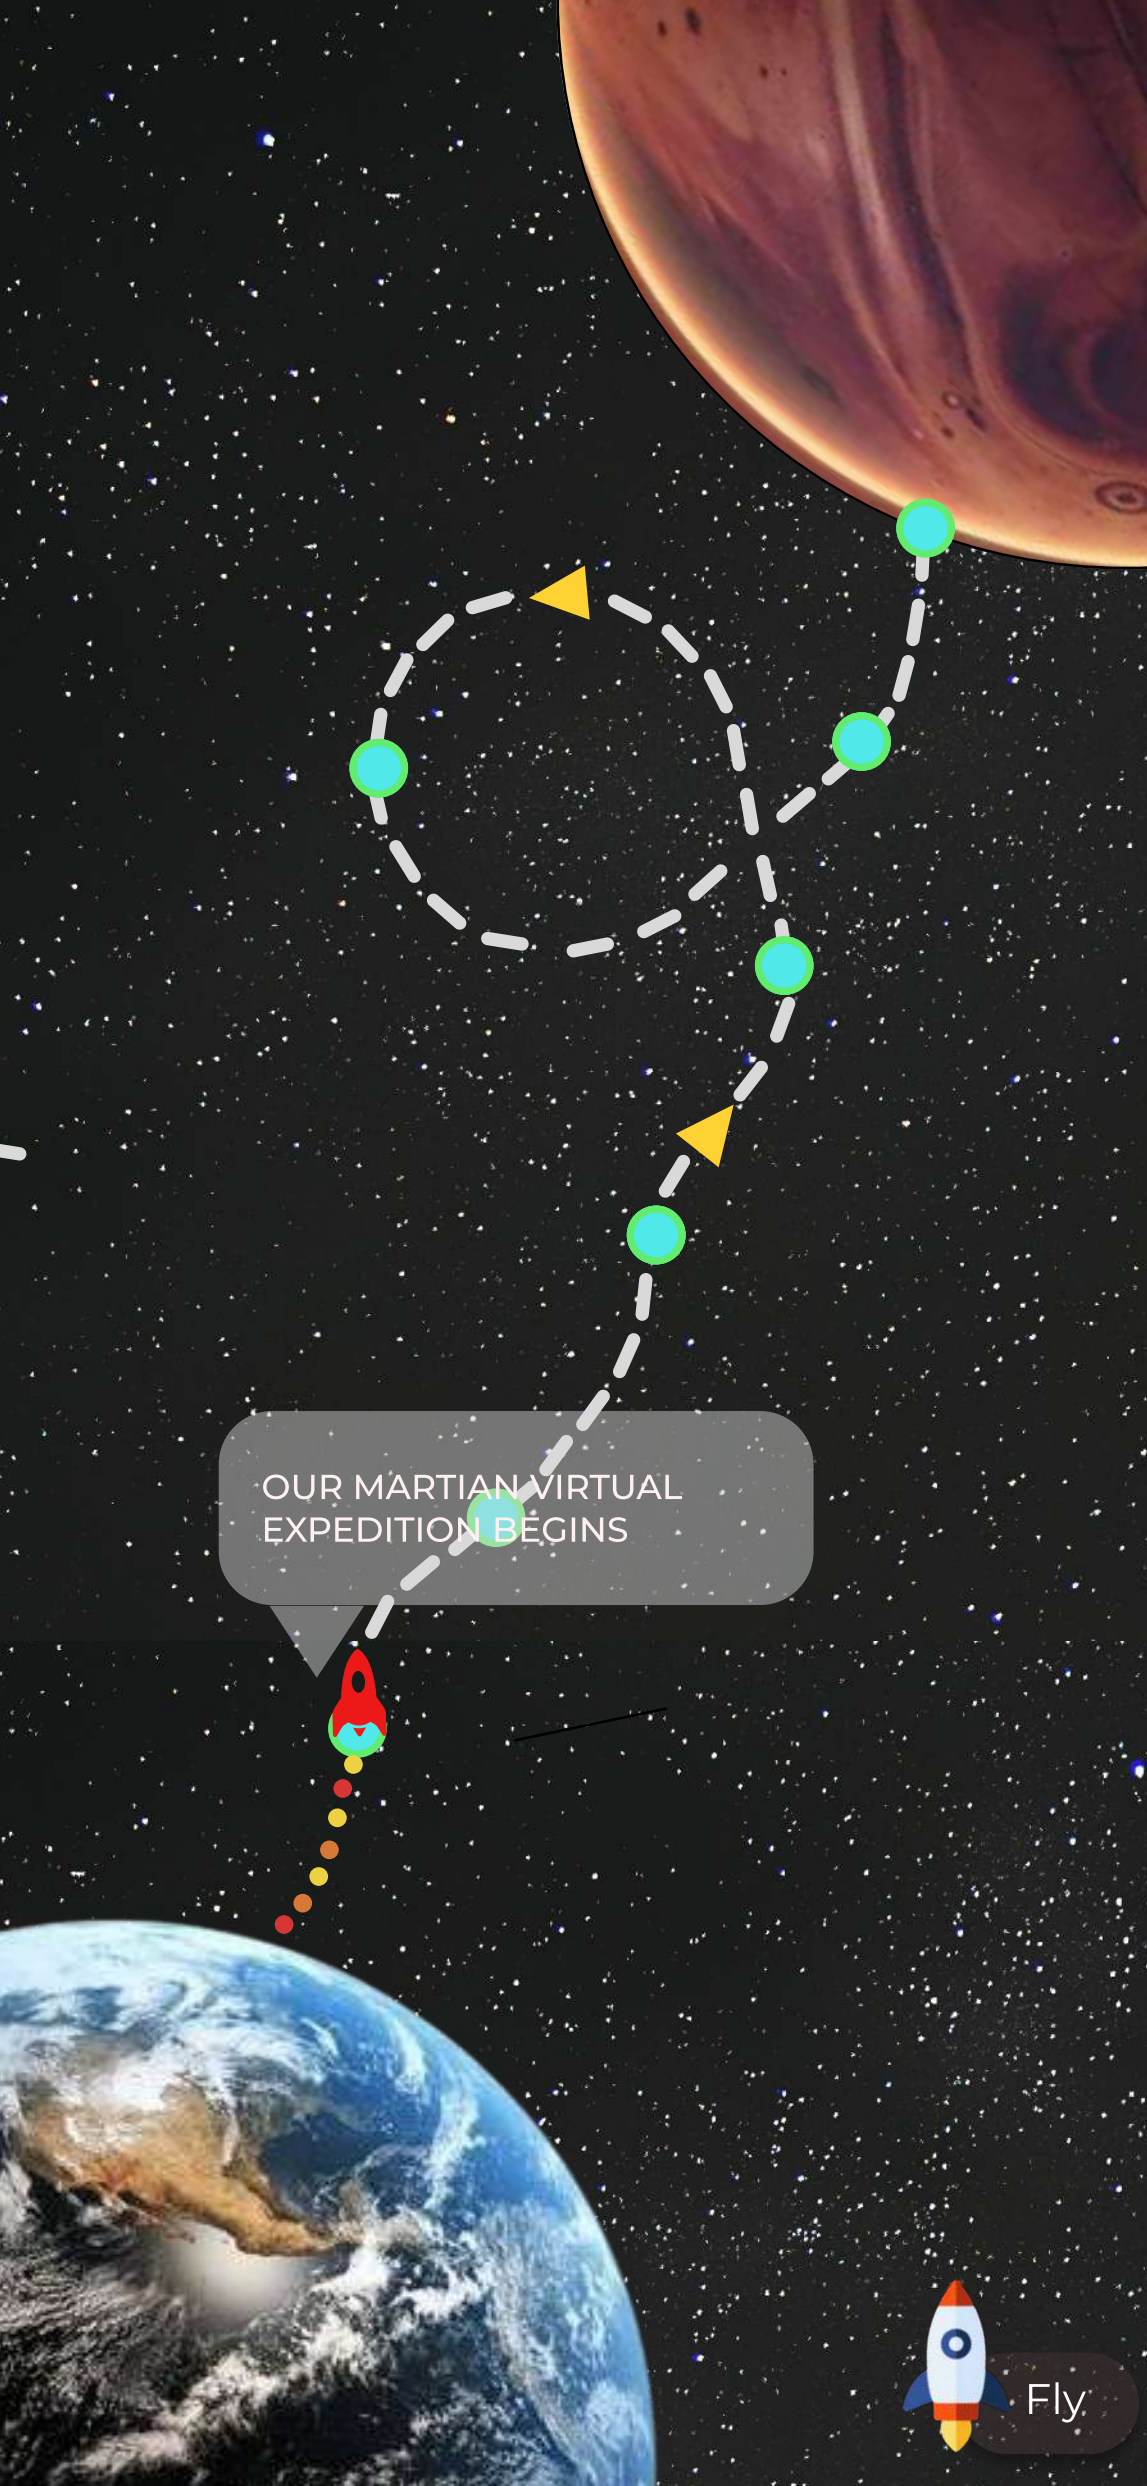

Fly

An aerial photograph of a Martian desert landscape, showing a vast, arid terrain with a prominent, dark, rounded feature in the center. The landscape is characterized by a mix of reddish-brown and dark brown hues, with visible erosion patterns and a large, dark, rounded feature in the center. A dark, rounded rectangular box is superimposed over the center of the image, containing the text "MARTIAN EXPEDITION" in white, uppercase letters.

# MARTIAN EXPEDITION

OUR MARTIAN VIRTUAL  
EXPEDITION BEGINS

Fly

## SEE WHAT YOUR TRIP INCLUDES

A seven-month journey to reach Mars

A five-month stay

A 3 months training is compulsory prior.

Exploring Mars' 7 famous places:

Valles Marineris

Iani Chaos

Bacquerel Crater

Olympus Mons

Gale Crater

Mawrth Vallis

North and South Pole

Fly

# Valles Marineris

Valles Marineris, or Mariner Valley, is a vast canyon system that runs along the Martian equator just east of the Tharsis region.

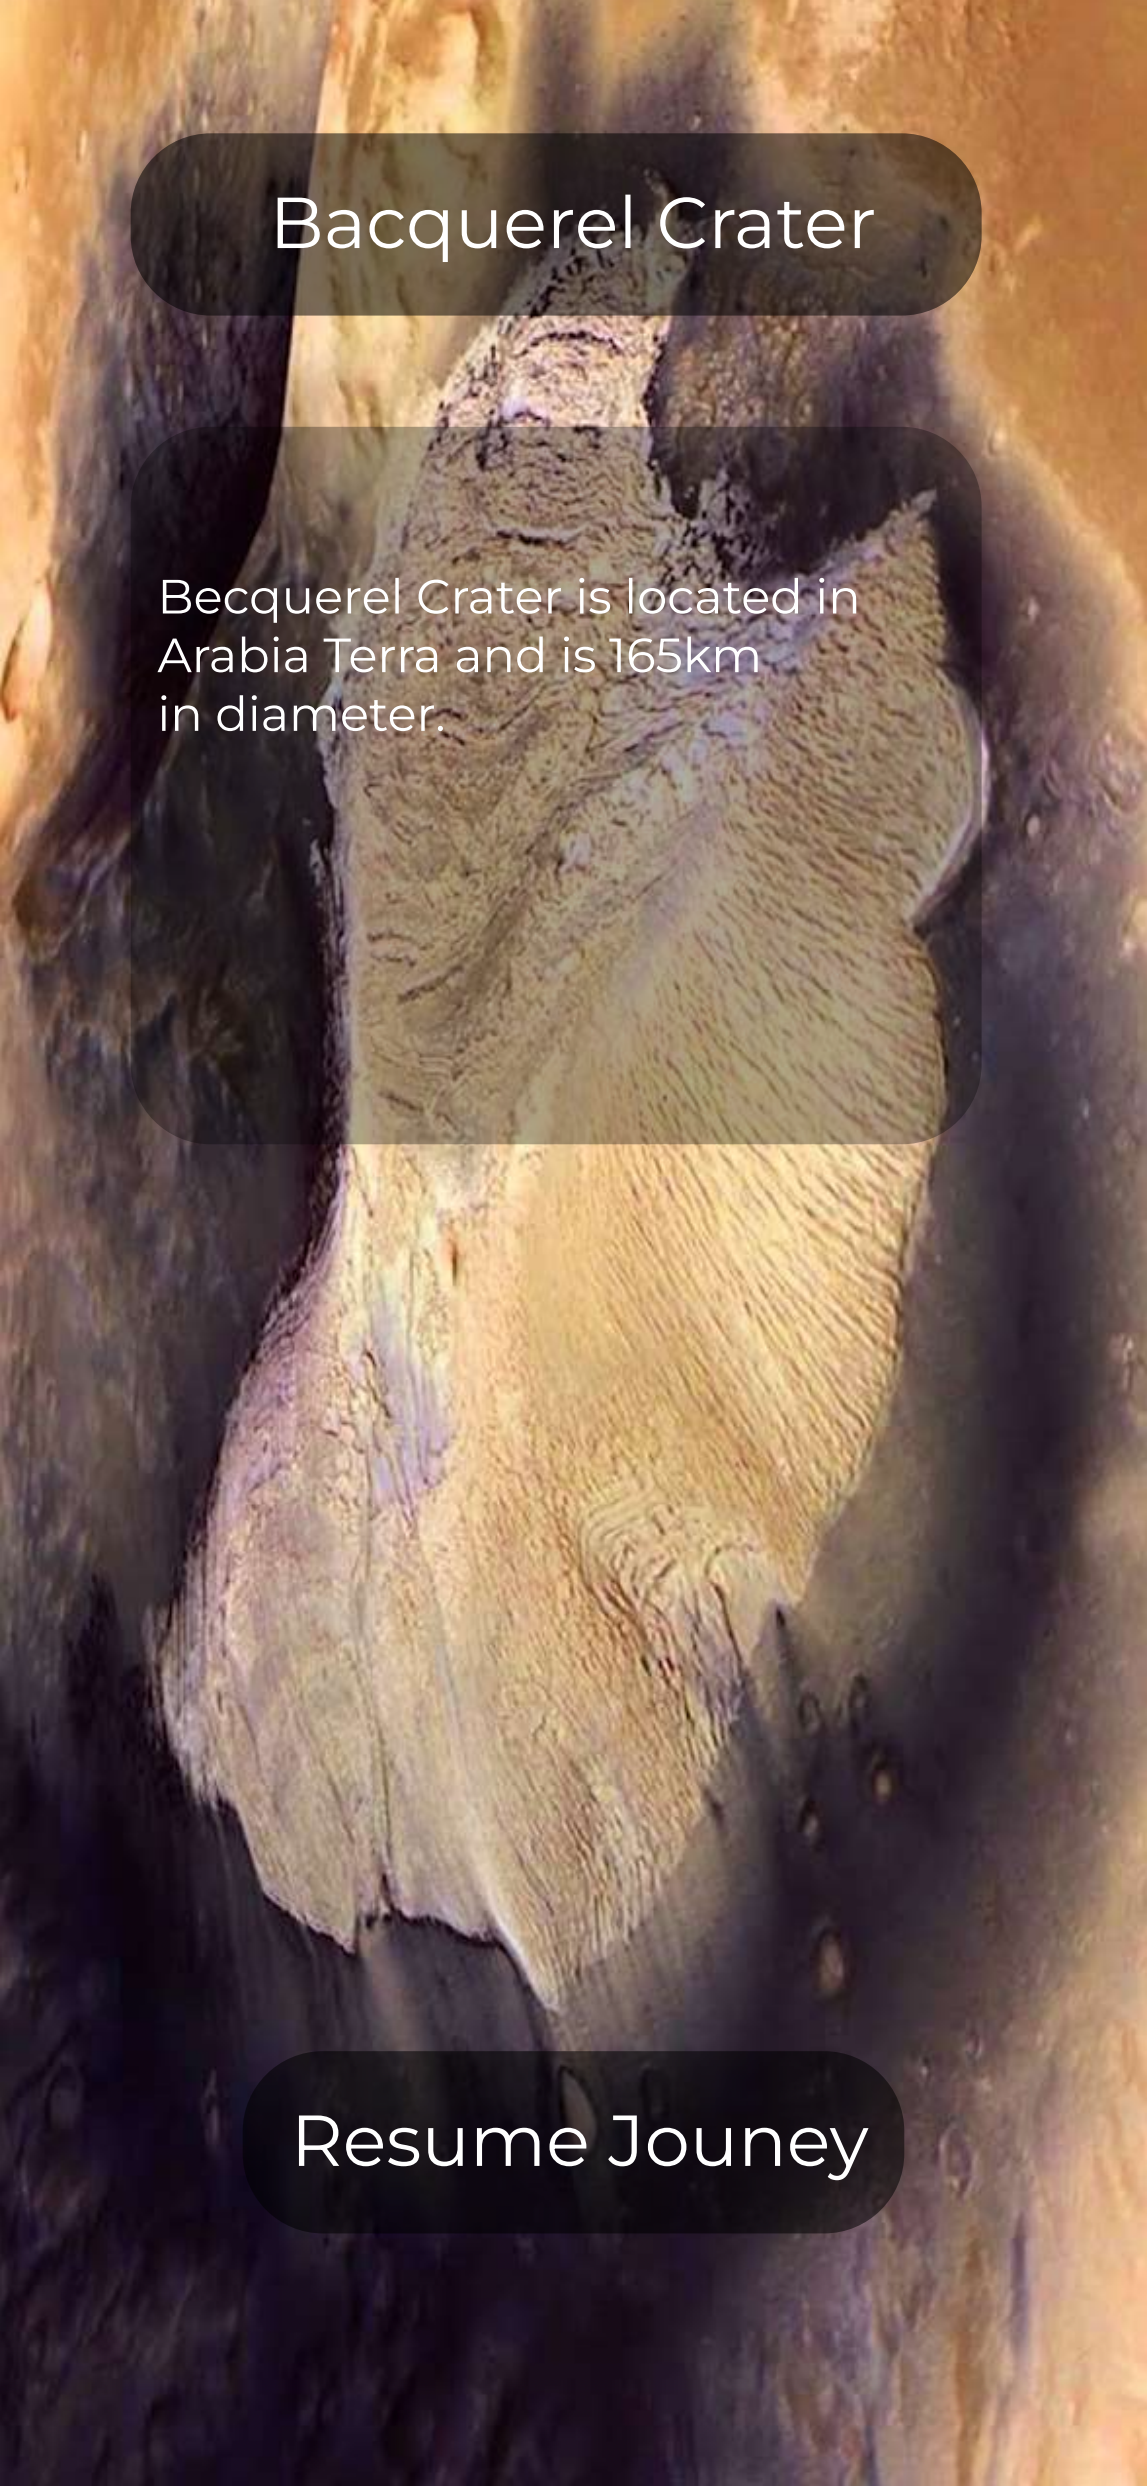

Resume Journey

# Iani Chaos

The chaotic terrain is widely believed to have formed via the removal of subsurface water or ice, resulting in flooding at the surface, and the formation of Ares Vallis.

Resume Journey

## Bacquerel Crater

Becquerel Crater is located in Arabia Terra and is 165km in diameter.

Resume Journey

# Olympus Mons

Valles Marineris, or Mariner Valley, is a vast canyon system that runs along the Martian equator just east of the Tharsis region.

Resume Journey

The background of the entire page is a high-resolution image of the Martian surface. It shows a vast, reddish-brown landscape with numerous craters of various sizes. A prominent feature is a large, light-colored, circular crater in the lower right quadrant. The surface is textured with rocks and dust, and the overall color palette is dominated by shades of orange, red, and brown.

# Mawrth Crater

Situated between the southern highlands and northern lowlands, the valley is a channel formed by massive flooding which occurred in Mars' ancient past. It is an ancient water outflow channel with light-colored clay-rich rocks.

[Resume Journey](#)

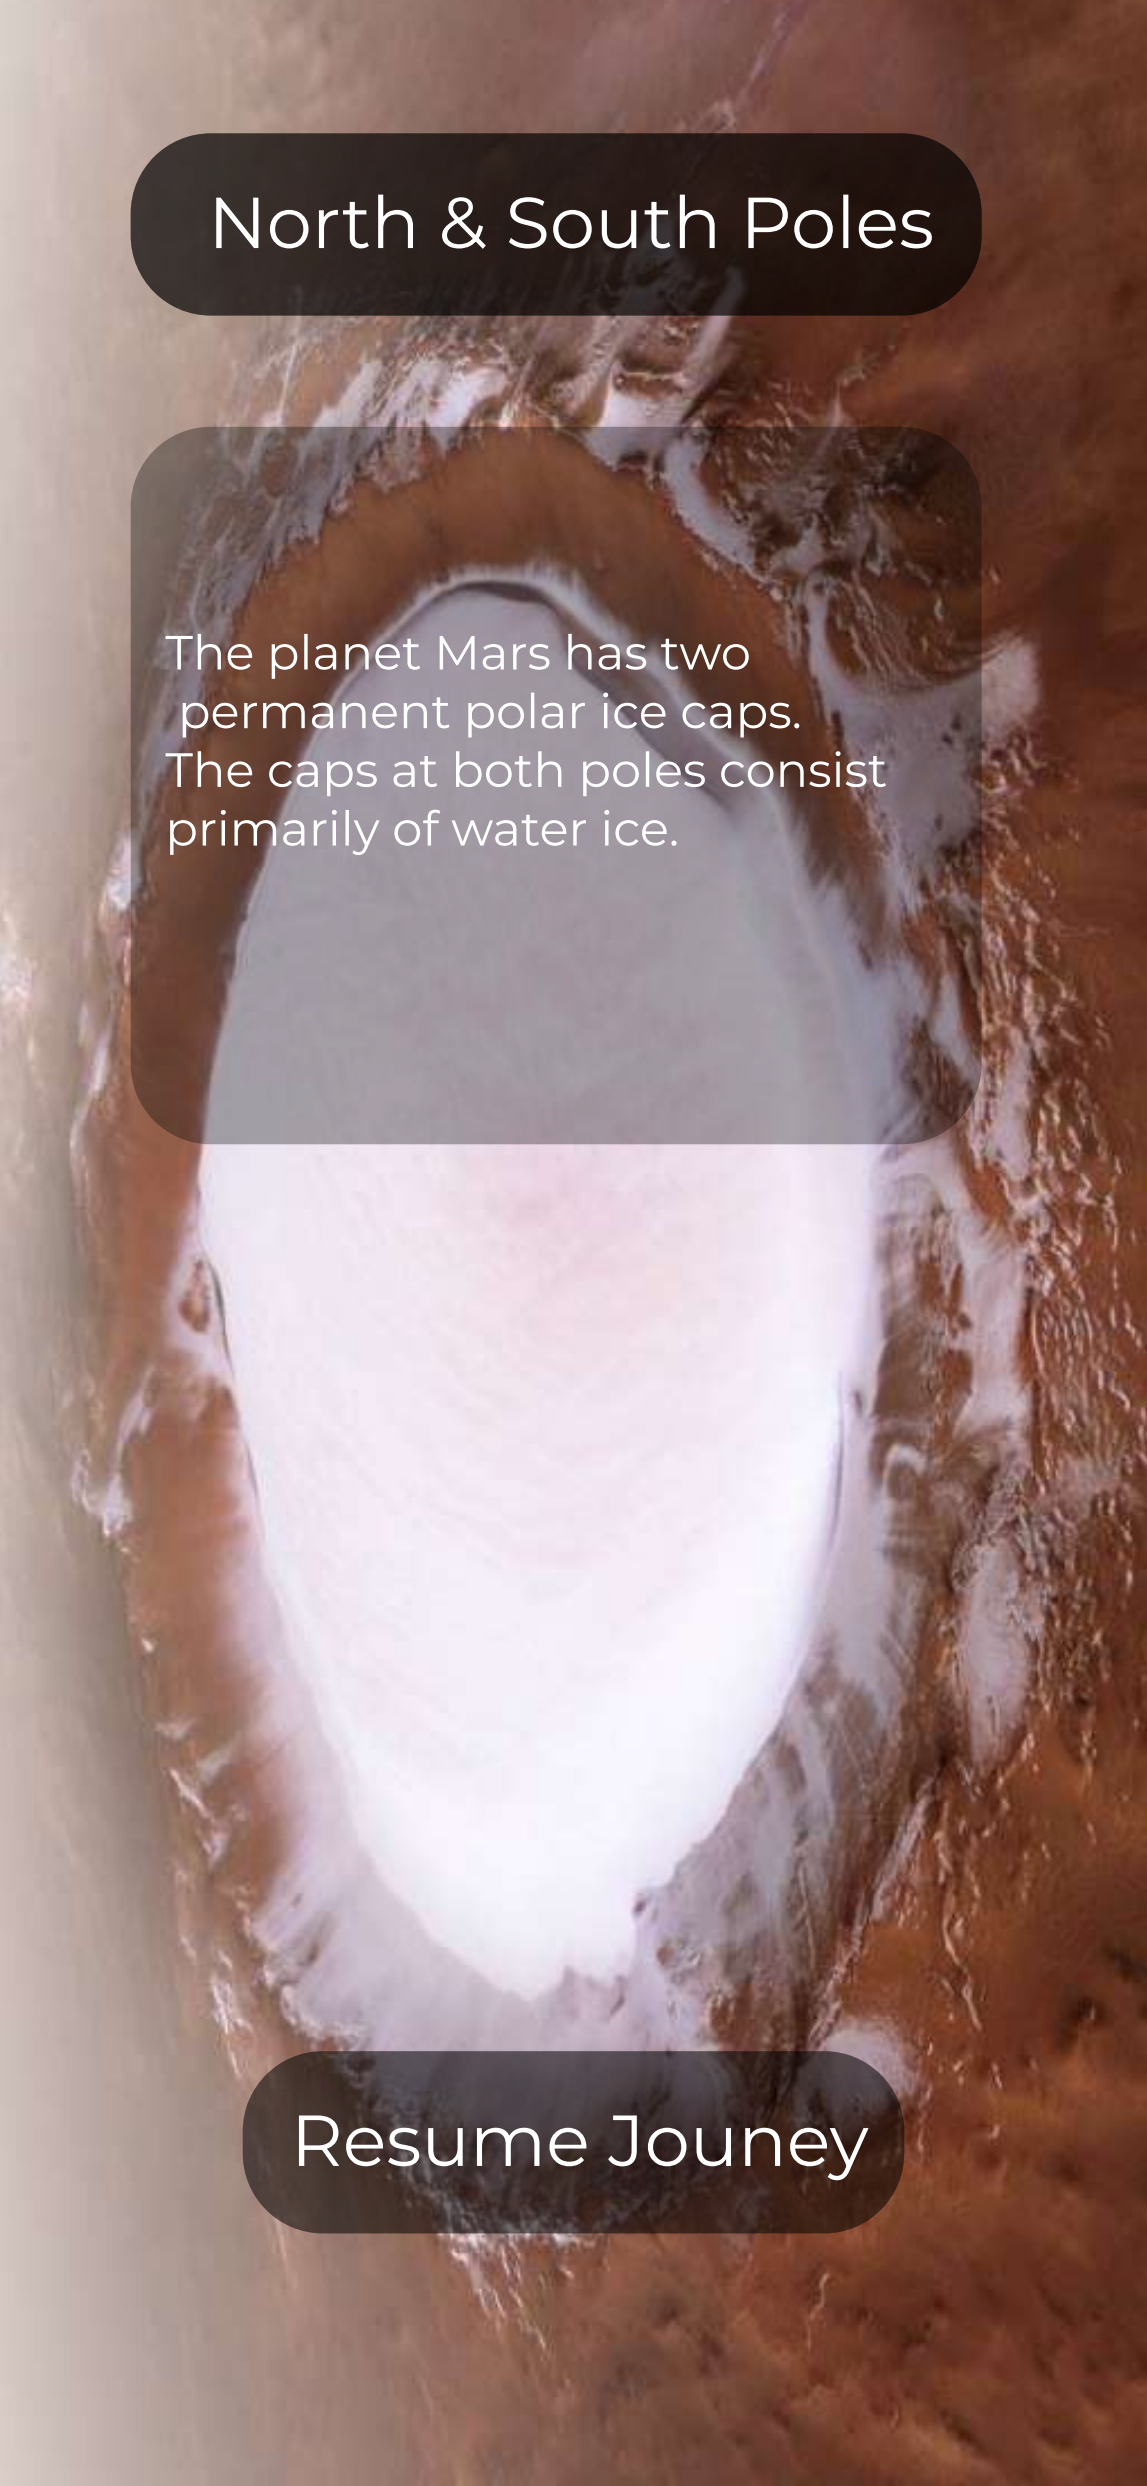

## Gale Crater

The crater formed when an asteroid or comet hit Mars in its early history, about 3.5 to 3.8 billion years ago. The impactor punched a hole in the terrain, and the subsequent explosion ejected rocks and soil that landed around the crater.

[Resume Journey](#)

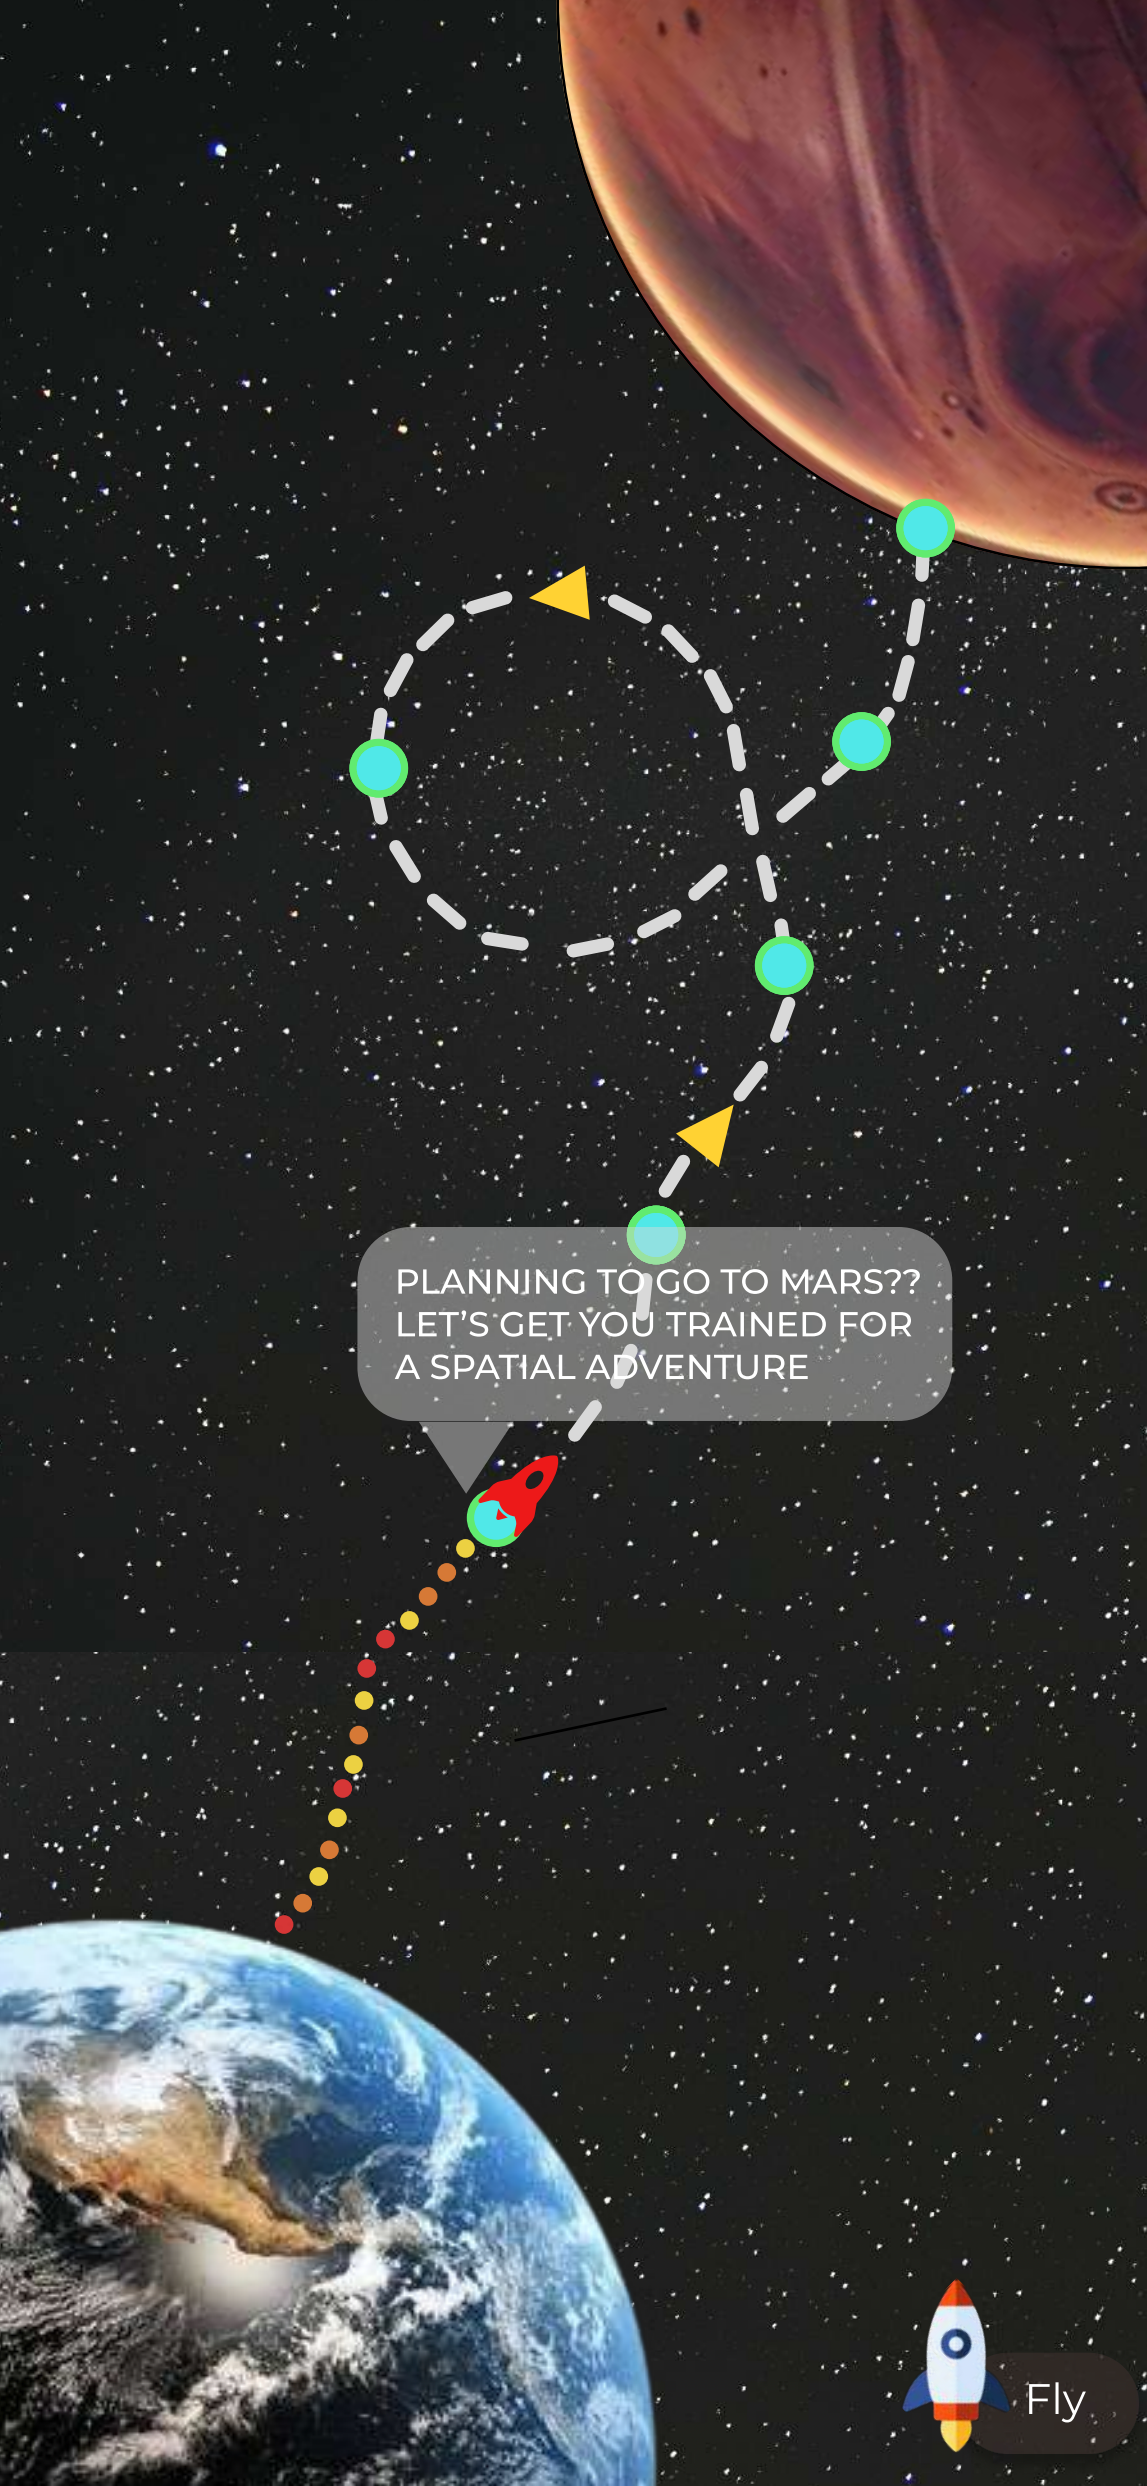

# North & South Poles

The planet Mars has two permanent polar ice caps. The caps at both poles consist primarily of water ice.

Resume Journey

PLANNING TO GO TO MARS??  
LET'S GET YOU TRAINED FOR  
A SPATIAL ADVENTURE

Fly

SEE HOW YOU ARE TRAINED

Training Program will commence  
at the JSC near Houston, Texas

The training period will be for  
3 months.

Expert astronauts will be helping  
with the training process

Passengers will be accompanied  
with skillful astronauts when  
they are anywhere out of their  
Space Capsule

THIS PROGRAM IS MANDATORY  
FOR EVERYONE

Fly

LOOKS LIKE THE TRAINING IS  
DIFFICULT BUT AN ABSOLUTE  
FUN!!!!!!  
LET'S NOW BEGIN THE TOUR  
OF OUR SPACESHIP

Fly

The background image shows the interior of a futuristic spacecraft or space station. It features a long, narrow corridor with rows of white, high-tech seats on either side. The ceiling and walls are metallic and have a complex, circular structure with various panels and lights. The floor is a polished, reflective surface. The overall lighting is cool and blue-toned, creating a high-tech, futuristic atmosphere.

## FACILITIES

Gravity modify-able rooms

Individual Capsules in space shuttle

24/7 Robotic Doctors

Backup Oxygen Cylinders

Robotic Bartenders

Unique restaurants

Space Gazing

Video Calling to Earth

Movie Theatre

Fly

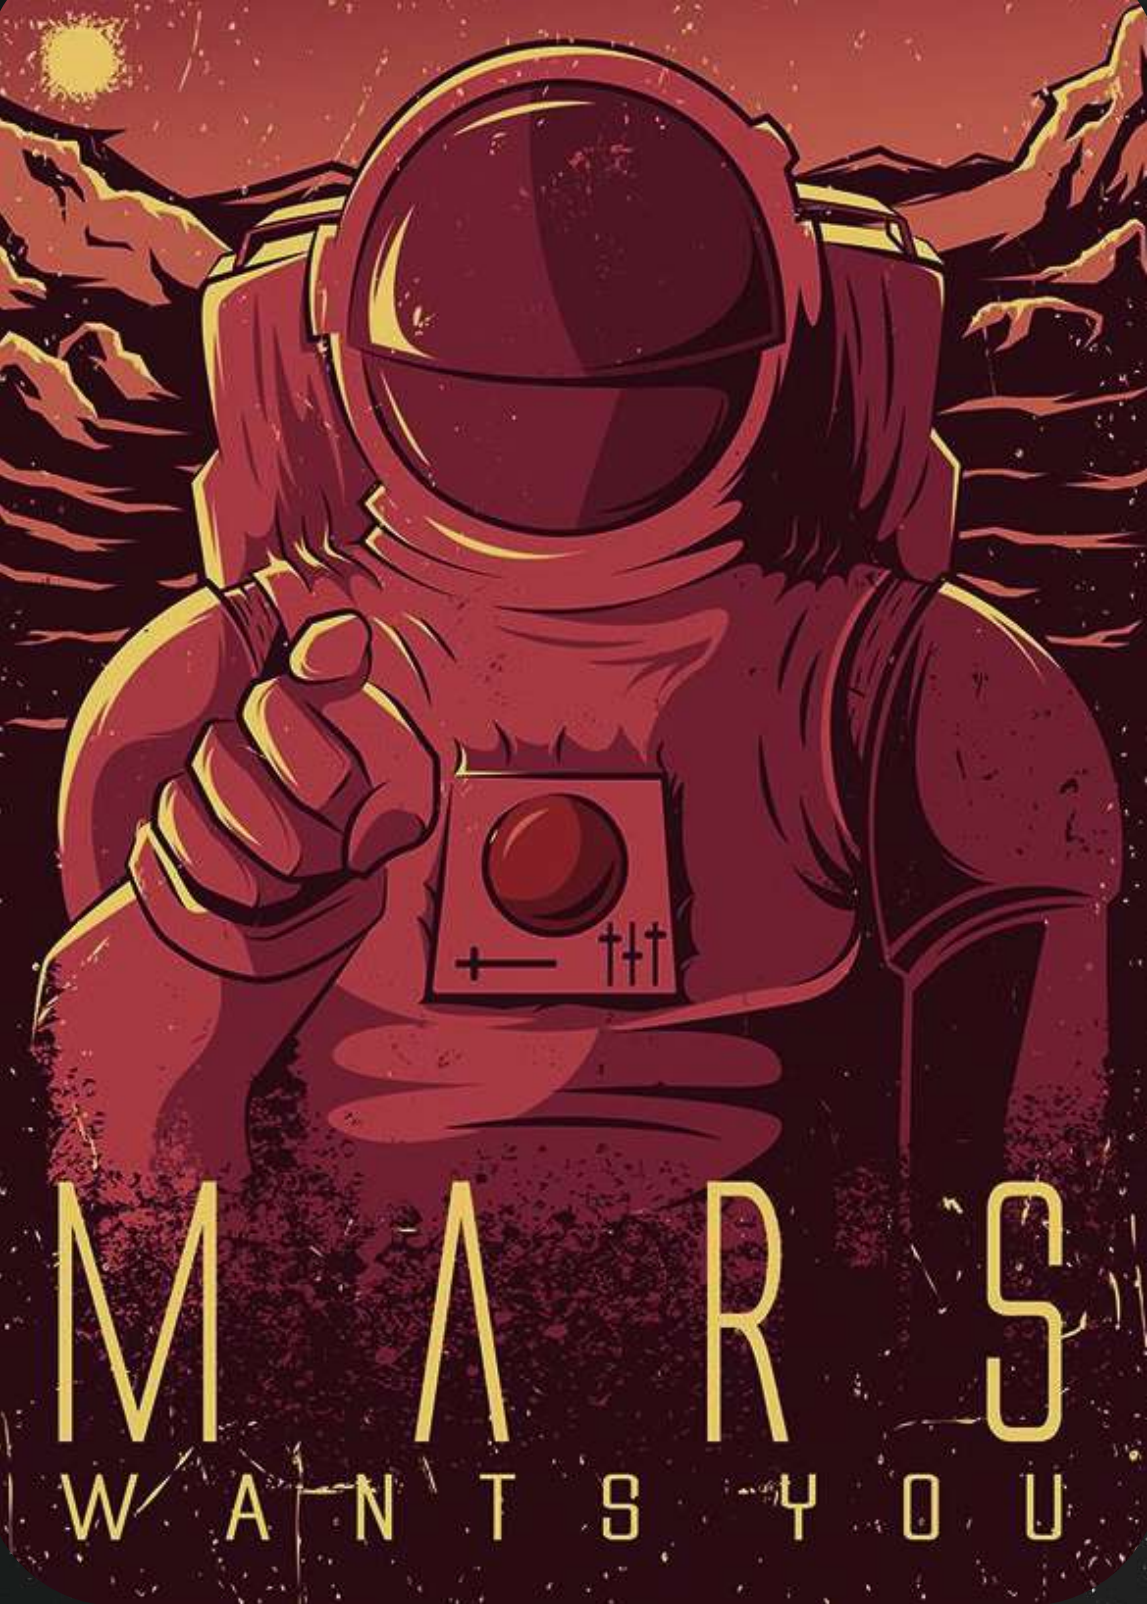

IMPRESSED BY OUR FACILITIES???  
LET'S GO TO MARS!!!!
